

Joong Hahn, DDS, MSD
Vinson Vig, DDS, MSD

Practice Limited to Endodontics

Thank You For Choosing Us

You have been referred by your dentist for endodontic treatment. Endodontists are dentists with two or more years of advanced training in endodontic procedures such as routine root canals, retreatment of previous root canals and endodontic surgery (apicoectomy). Endodontic treatment is necessary when the pulp (nerve) gets inflamed or infected from a deep cavity, deep fillings, crack, chip or trauma to the tooth. Signs of pulp damage include prolonged sensitivity to hot or cold, discoloration, swelling, tenderness to chewing and sometimes no symptoms at all. If left untreated, it will lead to an abscess.

We value your time so we offer convenient hours and one appointment root canal. Everyone has choices so again thank you for choosing us. We look forward to serving you.
